# Onsite Video Carousels Overview & Activation Guide

ONSITE VIDEO CAROUSEL

# Introducing Onsite Video Carousels

Onsite Video Carousels are a new Promoted Product Carousel type appearing on relevant search pages. This immersive format was designed to help brands tell their story and increase engagement with high-intent Kroger shoppers.

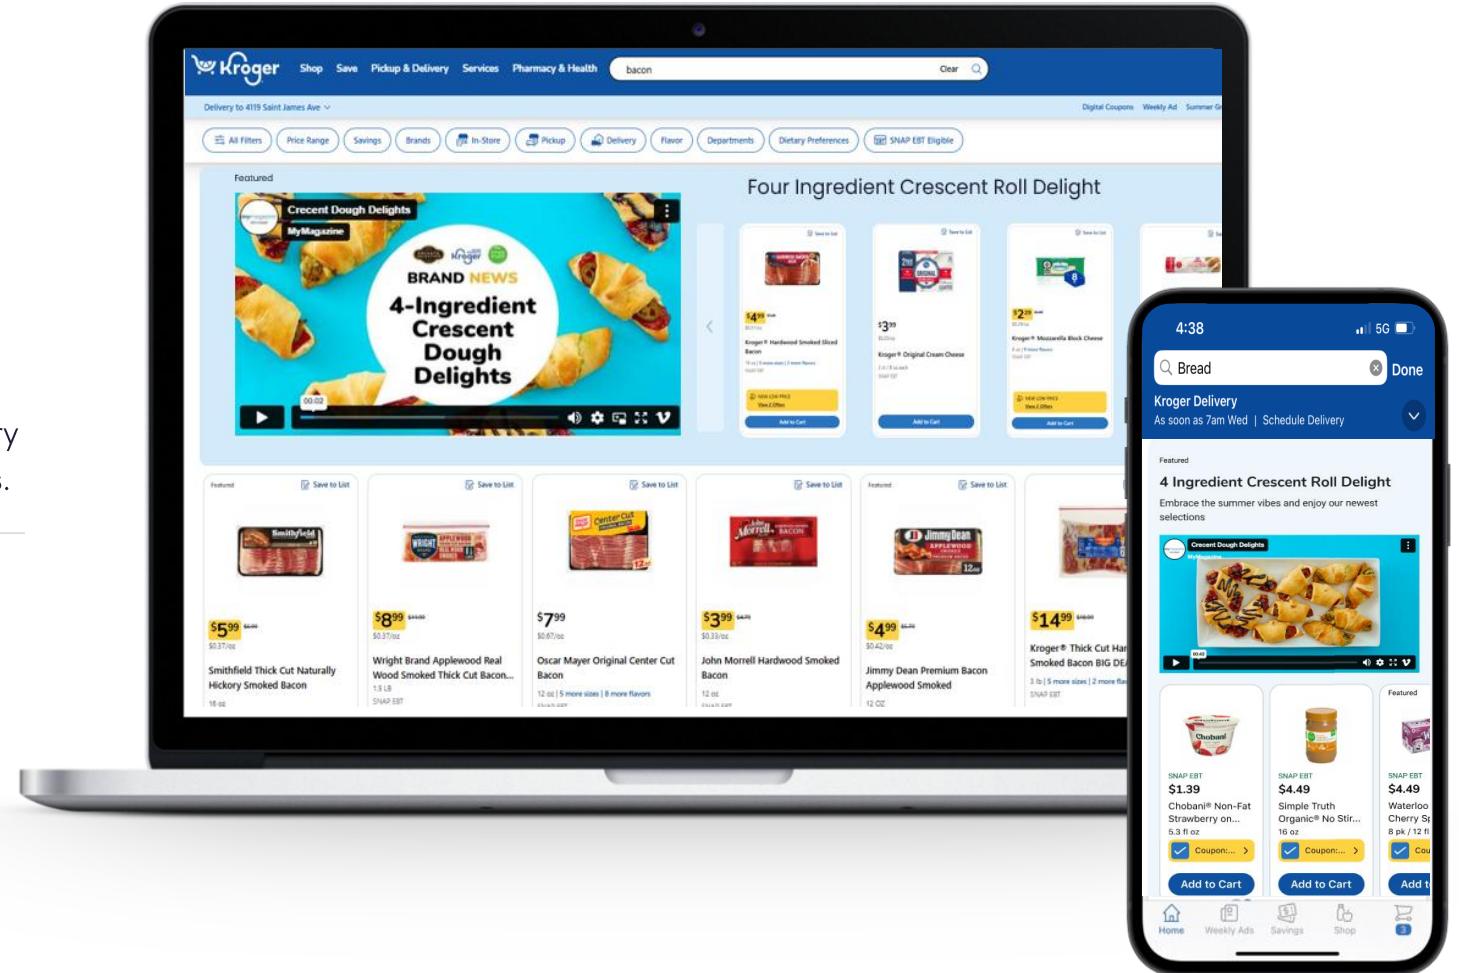

## Video Carousel Benefits

- ✓ Reach high-intent shoppers at the point of search and add-to-cart
- ✓ Drive engagement with immersive video storytelling
- ✓ Boost brand awareness and conversions through visual impact

ACTIVATION GUIDE

# Auction Details for Onsite Video Carousels

Onsite Video Carousels are a type of Promoted Product Carousels and will operate within the same auction as all other Carousels.

## AUCTION ELIGIBILITY

Active Carousels are eligible for auctions when at least one product in the carousel is included in the organic results.

## AUCTION CRITERIA

Auction criteria will evaluate carousels based on bid price and product quality score. The **minimum bid for Onsite Video Carousels** is \$1.30. Second Price Auction Rules apply.

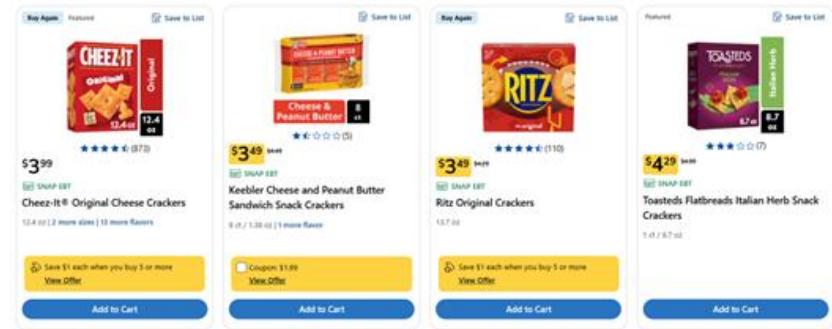

## AUCTION TYPE

Carousels will be charged for clicks on each unique product card or add to cart. A customer clicking on the video does not result in a charged click.

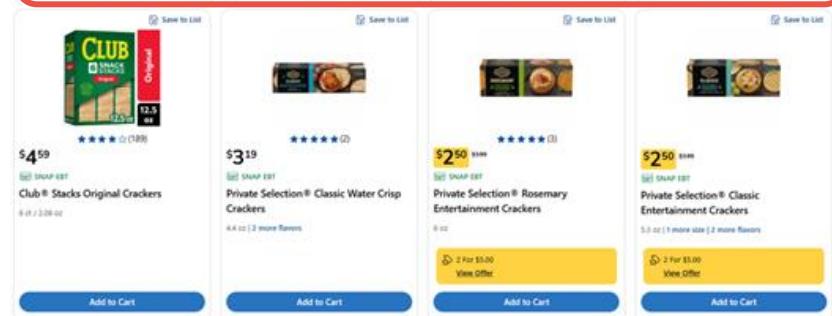

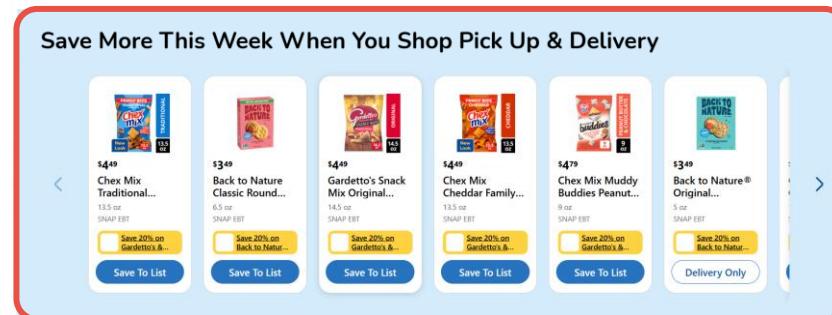

ACTIVATION GUIDE

# Ad Placements for Onsite Video Carousels

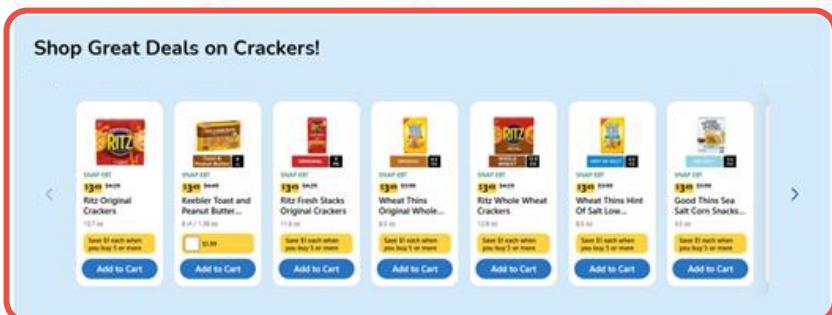

As with all Promoted Product Carousels, Onsite Video Carousels will be located below-the-fold within search results.

In the Kroger Mobile  
App:  
Row 5\* & Row 10

\*These rows are only utilized for Promoted Product Carousels if there is no Merchandising carousels live.

Onsite Video Carousel

# Carousel Best Practices

## Promote Multiple Brands

Multi-brand carousels can increase exposure onsite by unlocking additional sub-commodities. They can also increase the chance that a shopper will convert when there is a variety of options to click on.

## Mix Up The Product Order

When using multiple brands or product types, mix up the order of the products so a user doesn't see all similar items at once. More variety leads to more interest.

## Include as Many UPCs as Possible

Carousels that have 20 or more UPCs included, have experienced 1.4x the number of impressions, 1.7x the amount of revenue earned, and 1.9x the number of clicks.

## Select a Core Product

To ensure your Carousel is eligible to appear onsite in as many places as possible, we recommend including at least 1 of your top performing core products.

# Onsite Video Carousels

Accepted Formats	Recommended: .mov or .mp4 .ASF, .WMV, .M2TS, .TS, .MKV, .OGG, .FLV, .3GP, .3G2, .AVI, .MXF, .MPG, .WEBM
Bit Rate	2-5 Mbps
Length	5-60 Seconds (Recommended to be between 15-30 secs)
Copy	Header: 45 max characters. Title Case. Subtext (optional): 55 max characters. Sentence Case.
Static Thumbnail Image	16:9 ratio (1920 x 1080 pixels) - .jpg or .png - Max file size 5 MB - Images should be clean and clear.
Captions*	If spoken dialogue is encompassed within the Video, captions are required. These can be curated by Vimeo's auto caption science (driven by AI) or manually uploaded with a .vtt or .srt file.
Audio Description*	Audio file types: .aac, .ogg, .m4a, .wav, .mp3 Audio file size: 20MB (or less) The audio description is an audio track providing a description of what is visually happening in the video.
Guidelines	<ul style="list-style-type: none"> <li>- No play button overlay in video or image</li> <li>- No explicit language or nudity</li> <li>- No savings messages (e.g., Save \$1 off)</li> <li>- No competing retailer or brand language</li> <li>- No Text within the video should be positioned along the bottom of the screen to reserve space for captions</li> <li>- CTA is optional, but not recommended</li> </ul>

# Audio Description Example

“

Windex had people blind test their product on various mirrors. They comment that it doesn't drip, left no streaks, and cleans with just a wipe. The video concludes with the Windex Foam canister beside text saying "Try New Windex Foam."

”

## W H A T

Dubbed audio description of what is taking place in the video, for shoppers who are blind or visually impaired to understand.

## W H Y

Accessibility is a top priority at Kroger, and we're proud to maintain level AA WCAG compliance, ensuring that all customers can engage fully with our site and app.

\*Requirement for all videos. Track length to not exceed video length.

Onsite Video Carousel

# Video Best Practices

Featured

**Made for Busy Back-to-School Days**

**Videos Should be Short and to the Point**

**Highlight Important Details with Visuals Rather than Narration**

**Make Your Product(s) Easy to Spot**

**Include Your Product & Brand Logo in the Thumbnail Image**

**Utilize the Headline and Subtext to Reiterate the Most Important Details**

## Video Metrics Available

View Through Rate,  
Completion Rate,  
Quartile Views

# Video Metric Definitions

Video Starts	Video Pauses	Video Complete Views	Video Total Duration
The number of times a video ad was started.	The number of times a video ad was paused.	The number of times a video ad was completed.	Total duration, in seconds, of the video ad.
Video Average View Duration	Video First Quartile Views	Video First Quartile View Rate	Video Second Quartile Views
Average video duration, in seconds, watched per ad.	Number of views that watched at least 25% of the video ad.	Percent of views that watched at least 25% of the video ad.	Number of views that watched at least 50% of the video ad.
Video Second Quartile View Rate	Video Third Quartile Views	Video Third Quartile View Rate	Video Complete View Rate
Percent of views that watched at least 50% of the video ad.	Number of views that watched at least 75% of the video ad.	Percent of views that watched at least 75% of the video ad.	Percent of ad views that watched the entire video ad.
Video View Through Rate			
Percent of ad impressions that watched the entire video ad.			

Onsite Video Carousel

# Possible Optimizations

Optimizations can be made to Carousels through the product selection, product order, multi-brand selection, division selection, budget amount, and the carousel bid.

For Video Carousels, more engaging videos could lead to stronger performance.

## Optimize for ROAS

Pull a KAP report that includes the Product ID, CTR, Clicked Revenue, and Clicked ROAS

- + Review the product level performance. Whether you want to optimize for ROAS, CTR, Sales, etc.
  - 1) Shift the top performing products to the front of the carousel
  - 2) Shift the worst performing products to the back of the carousel
- + If all products are not performing well, consider adding different products to the carousel.
- + Lower the carousel bid

## Optimize for Under Pacing

Pull a KAP report that includes Time Live and Win Rate at the ad group level

- + If win rate and time live are close to 100%, the ad is maxing out its current available opportunities. To spend more, the ad will need more opportunities to go after.
  - 1) Add products that would introduce new sub-commodities
  - 2) Create a multi-brand carousel to target more sub-commodities
  - 3) Select all divisions
- + If win rate is low and time live is high, the carousel bid needs to increase to win more of the existing opportunities.
- + If your brand has multiple Carousels competing against each other, ensure there are different products selected in each one, and set different bids based on prioritization.
